

The NHS Direct Wales website is the main NHS portal in Wales for consumer health information and is a source of information that can assist the public in managing their own, and their family's, health.

As you may already be aware, there is a lot of information and many resources available on the NHS Direct Wales website www.nhsdirect.wales.nhs.uk which may be useful.

The website has an A-Z encyclopaedia of conditions, tests and treatments with topics like head lice and chickenpox. They also have the full childhood vaccination schedule and information about each vaccine.

One of the newer features is a head lice symptom checker which will allow you to assess your child's symptoms and give useful information and advice on what to do next.

You can also follow them on Twitter @NHSDirectWales and like them on Facebook - NHS Direct Wales.
